Re: Medical Dispute Resolution
MDR #: M2-03-1006-01
IRO Certificate #: 5055

In accordance with the requirement for TWCC to randomly assign cases to IROs, TWCC assigned your case to ____ for an independent review. ____ has performed an independent review of the medical records to determine medical necessity. In performing this review, reviewed relevant medical records, any documents provided by the parties referenced above, and any documentation and written information submitted in support of the dispute.

The independent review was performed by a matched peer with the treating health care provider. Your case was reviewed by a physician who is Board Certified in Orthopedic Surgery.

Brief Clinical History:

This is a 54-year-old woman who has had back pain for some time as a result of a work-related injury on _____. MRI findings revealed core compression at L4-5. She has had cortisone shots, epidurals, physical therapy, and analgesics, but has failed to respond.

Disputed Services:

L4-5 decompression.

Decision:

The reviewer agrees with the determination of the insurance carrier. The reviewer is of the opinion that decompression is not medically necessary in this case.

Rationale for Decision:

The patient has no localizing findings. A positive MRI does not necessarily mean that a patient is in need of surgery. Surgery should be carried out on physical findings and not for pain alone.

I am the Secretary and General Counsel of ____ and I certify that the reviewing physician in this case has certified to our organization that there are no known conflicts of interest that exist between him and any of the treating physicians or other health care providers or any of the physicians or other health care providers who reviewed this care for determination prior to referral to the Independent Review Organization.

We are simultaneously forwarding copies of this report to the payor and the Texas Workers' Compensation Commission. This decision by ____ is deemed to be a Commission decision and order.
